ABOUT THE UNIVERSITY AND VIT SCHOOL OF LAW

VIT, founded by the educationalist Dr. G. Viswanathan in 1984, maintains high academic standards. It excels in research and strives to be on a par with the best in the world. VIT Chennai was started in 2010 and it is a globally engaged, competitive, comprehensive, research-enriched university campus strategically positioned to respond to major industrial, social, economic, legal, environmental demands and challenges. VIT School of Law (VITSOL), the progeny of VIT, entered the legal education arena in 2014, aiming at high goals. The Law School aims to impart quality legal education to nourish young minds with knowledge of law, teach them the nuances of legal profession and equip them for the practical aspects of the profession. VITSOL believes in continuous and active learning simultaneously with practical training. Legal education is not just mastering of the subject or remembering various provisions of the law. It is the overall development of an individual to make him a legal professional. Studying law in VIT is a unique experience as VIT offers a blend of the best features of quality education. The law courses in VITSOL have been structured in such a way that the students can learn law in a professional setting with Law Clinics, Moot Courts, Conferences and Seminars on contemporary legal issues. This gives them an edge in this competitive world.

ABOUT THE CONFERENCE

The scope of International law has developed over the last few decades and has grown exponentially since the dawn of globalized era. From the regulation of space expeditions to the question of the division of the ocean floor, and from the protection of human rights to the management of the international financial system, its involvement has spread out from the primary concern with the preservation of peace, to embrace all interests of contemporary international life. International law has developed both horizontally and vertically. In the dynamic stream of laws, we constantly witness that International law has crossed path with national laws and have thus created a symbiotic relationship to survive in this globalized epoch.

Globalization has become synonymous to the spreading of capitalistic regimes all over the world. While the focus of International Law is primarily on regulating the sovereign states and generally delegates the regulation of MNCs to individual states, the Corporates like Google, Facebook have supplanted sovereign states and they have attained a powerful status in the regime of sovereignty. The Globalization-corporate nexus has major implications on not just trade and intellectual property rights but on diverse legal regimes like human rights, labour rights, environment and air and space laws. For the facilitation of trade, commerce, International law has been incorporated into the municipal laws. Thereby it raises the questions like whether the sovereign states can effectively control corporates through national legislations or whether the International law need to further develop to empower/guide the states to come up with uniform and harmonized national laws to effectively regulate the activities of MNCs. The conference offers a platform to analyse the extent of convergence of International law and National legislations in regulating the activities of Multi-National Corporates which might have trans-national impact and repercussions on the subjects of International Law.

CALL FOR PAPERS

Original unpublished Research Papers/Articles and Case studies are invited from academicians/research scholars/advocates and students for presentation at Conference. The papers will be selected after at plagiarism check of permissible upto 10% of a Turnitin report. The abstract and full paper will undergo double-blind peer review process by the expert review committee before selection. Out of the presented papers, a list of selected papers on a competitive basis will be published (publication charges apply) in a book with an ISBN numbers.
