About the College:

Dharmanand Uniyal Government Degree College, Narendra Nagar (Tehri Garhwal)

Narendra Nagar is a scenic spot located at an altitude of 1100 meters above sea level in the central Himalayas in the Tehri Garhwal district of Uttarakhand state, which also plays an important role from the historical point of view. It is situated at a distance of 15 km and 75 km from Rishikesh and district headquarters Tehri Garhwal respectively. Keeping in view the local requirement, Government College, Narendra Nagar was established in the year 2006. The college has been successfully conducting professional courses like Tourism Management and Journalism along with Faculty of Commerce, Faculty of Arts, Faculty of Sciences. The college is covered under 2(f) status of University Grants Commission (UGC).

About the Seminar:

India is one of the youngest nations in the world with more than 62% of its population in the working age group (15-59 years), and more than 54% of its total population is below 25 years of age. Skill and entrepreneurship are driving forces of economic growth and social development for any country. Countries with higher levels and better standards of skills adjust more effectively to the challenges and opportunities in domestic and international job markets. The first National Policy on Skill Development was notified in 2009. In the aftermath of this policy, National Skill Development Corporation (NSDC) was established in 2009 to promote private sector participation via innovative funding models. Later in 2013, National Skills Development Agency (NSDA) was created which has been working with State governments to rejuvenate and synergise skilling efforts in the all the states.

In order to ensure that young entrepreneurs are encouraged and suitably equipped to go into new ventures, the Government has been providing assistance for establishment of Training Institutions and Entrepreneurship Development Institutes (EDIs) for imparting entrepreneurship and skill development training. These institutions have been providing entrepreneurship and skill development training to the first generation entrepreneurs by helping and supporting them in the establishment of their enterprises. Government is making consistent and concerted efforts to accelerate and promote entrepreneurship by providing support for strengthening of training, infrastructure as well as programme support.

Another sector which is working towards creating young entrepreneurs is the Micro, Small and Medium Enterprises (MSMEs). The MSME sector is a highly vibrant and dynamic sector of the Indian economy. MSMEs not only play crucial role in providing large employment opportunities at comparatively lower capital cost than large industries but also help in industrialization of rural & backward areas, thereby, reducing regional imbalances, assuring more equitable distribution of national income and wealth. MSMEs are complementary to large industries as ancillary units and contribute enormously to the socio-economic development of the country.
