Round Table Conference on

India's Preparedness to Protect Critical Infrastructure and Digital Public Platforms

The **G-20** Effort to Promote Technological Transformation, Digital Infrastructure and Cyber security

5 August 2023

Organized by

Centre for Cyber Laws
National Law University, Delhi
in association with
Global Academy of Law-Tech Education & Research

About the Event

Technological transformation, digital infrastructure and cyber security are one of the main themes under the G20 agenda. Amidst the necessity for adopting digital transformation and technological advancement, cyber security challenges and concerns attract equal attention of the G20 nations.

Post Covid, the access points have increased as people are working from home, and devices are exposed across multiple locations. Businesses including banking & telecommunication services, in their attempt to move to the cloud, have added to the complexity of the cybersecurity issue. Service providers realise that they need to embed cybersecurity right from the beginning. In last five years, the number of cyber security attacks have gone up drastically. A defined cybersecurity strategy while undertaking digital transformation is of paramount importance.

The G20 nations have to work together towards promoting digital transformation and handling cyber security threats and risks. Recently, in Hyderabad, the G20 Second Digital Economy Working Group Meeting was conducted with a focus on digital public infrastructure and cyber security. The meeting was successful in not only identifying the existing issues related to digital transformation in India including the issue of huge digital divide, it also helped to draft concrete suggestions towards robust cyber security.

About the Event

As digital technology is the driving force behind the development and transformation of different sectors, it is imperative to conduct multi stakeholder deliberations with the following focal points:

- Digital transformation in various sector- issues & challenges;
- Digital literacy and infrastructure;
- Minimize the digital divide;
- Digital inclusion and collaboration on digital inclusion technology;
- Regulatory aspects of digital technology;
- Challenges in smooth digital transformation;
- Gaps in implementation of digital technology;
- Cyber security issues & challenges;
- Protecting critical infrastructure and digital public platforms;
- Role of multi-stakeholders in ensuring safe and hassle-free digital transformation;
- Preparedness for the future;

The **Centre for Cyber Laws, National Law University Delhi**, in association with the **Global Academy of Law-Tech Education and Research** with an aim to contribute towards holding more profound and outcome-based deliberation and discussion on the identified issued is pleased to host a round table conference on **"The G-20 Effort to Promote Technological Transformation, Digital Infrastructure and Cyber security: India's Preparedness to Protect Critical Infrastructure and Digital Public Platforms"**
