

## Internship Opportunity at CPC Analytics

### About CPC Analytics

CPC Analytics is a policy and data analysis consultancy based in India and Germany, founded in 2014. It empowers stakeholders to make evidence-based decisions towards better policy formulation and implementation. CPC Analytics' interdisciplinary and intercultural team brings together experience in quantitative data analysis, qualitative policy research, project and business management and a broad spectrum of thematic expertise. Its mission is to provide decision-makers from the public and private sector and civil society with diligent data and policy analysis and advice.

### Some Recent Projects

#### 1. Consulting:

Throughout 2021, CPC has had the chance to be part of two start-up teams bringing two exciting new initiatives to life, which both serve the purpose of improving public health intelligence in epidemics - one of them at the local level and one of them at a global scale.

- a. WHO Hub for Pandemic and Epidemic Intelligence
- b. Public Health Intelligence Hub, Pune

#### 2. Policy Research:

It conducts qualitative research on a variety of topics, backed by evidence to formulate, implement, evaluate or recommend policies to various governments or institutions.

- a. Pune Economic Vision 2025: Outlining Pune's Economic Growth Potential
- b. Governing Health Futures 2030: Exploring the convergence of digital health, artificial intelligence (AI), and other frontier technologies with universal health coverage (UHC)

#### 3. Data Analysis:

- a. The geography of scientific evidence on alcohol: A bibliometrics analysis (In collaboration with WHO)
- b. Mapping Child Sexual Abuse in Delhi (With *Save the Children*)
- c. Analysis of the impact of Environmental-Social-Governance violations on loan defaults

### Internship at CPC

CPC Analytics provides an opportunity for undergraduate and graduate students from diverse backgrounds to engage with different thematic areas in the public policy space, get first hand insights into research and data analysis, and a chance to learn new skills.

### Internship Roles and Responsibilities:

1. Work in an interdisciplinary team to understand research requirements in the field of data analytics and public policy across themes of health, education, politics and economics
2. Construct reports using insights gained from the research processes
3. Assimilate cutting-edge and up to date research on all projects
4. Ensure outputs produced match our analytical, rigorous and visual quality standards
5. Initiate and follow-up on internal research projects by exploring possibilities advanced analytics has to offer in social sciences
6. Conduct quantitative and statistical analysis using various software like R as a part of the research that can be automated

### Intern Profile

1. Passion to work in the public policy space
2. Excellent oral and written communication skills in English
3. Open to new ideas and initiatives
4. Building connections between different thematic concerns to holistically understand the research projects
5. Ability to take ownership and execute tasks independently

### What CPC offers

1. Dynamic and friendly work environment
2. Curious and young team
3. A platform to put forth new initiatives and ideas
4. Interesting problem statements to work on
5. Chance to publish OP-EDs, articles and papers at reputed platforms

### Some Recent Articles Published by Interns
