ABOUT THE INSTRUCTOR: PROF (DR.) RICKY LEE

Ricky obtained his LL.B. and B.A. at the University of Adelaide in 1999, followed by an LL.M. in International Law from the Australian National University in 2001 and a Ph.D. in International Law from Murdoch University in 2010 with a dissertation on “Creating a Practical Legal Framework for the Commercial Exploitation of Mineral Resources in Outer Space”. He also has a Graduate Diploma in Chinese Business Law from the University of Western Australia. He commenced lecturing at the University of Western Sydney in 2000 and has worked in legal practice since 1999, specialising in international business law and air and space law. He is also an Intellectual Forum Senior Research Associate at the Jesus College, University of Cambridge. He is currently the Adjunct Professor at the University of Notre Dame, Sydney, Australia

COURSE DESCRIPTION

This comprehensive course delves into the intricacies of International Air Law and International Space Law, two dynamic fields that govern the use and regulation of airspace and outer space. Over the course of seven days, participants will gain a deep understanding of the legal frameworks that govern aviation and space activities, from historical developments to contemporary issues. Throughout this course, participants will explore the historical and structural aspects of international air and space law, fundamental principles of key conventions, rights, and duties of states in outer space, state responsibility, and sovereignty. The course also covers contemporary topics such as the regulation of commercial aviation, space weaponization, property rights on celestial bodies, and private space activities.

This program is designed for legal professionals, students, researchers, and anyone interested in the legal aspects of air and space activities. The interactive sessions and opportunities for student engagement will provide a well-rounded understanding of the legal frameworks that govern the skies and outer space.

COURSE LEARNING OUTCOMES

After successful completing of the course the participants would be able to:

1. Describe the historical development and structural elements of international air and space law.
2. Explain the significance of the Chicago Convention and Montréal Convention & other international instruments in regulating aviation and space activities.
3. Compare and contrast the regulations governing commercial aviation and space activities.
4. Evaluate the legal consequences of state responsibility in air and space incidents.
5. Formulate policies or guidelines for regulating private space activities in accordance with international space law.
