

DSCI Public Policy Summer Internship Program 2024

The Data Security Council of India (DSCI) is excited to announce our Public Policy Summer Internship Program 2024. We invite applications from **law, technology, and public policy** students to join our dynamic cohort.

Ready to take the next step in your public policy career? Join our mission to shape the future of technology policy!

Public Policy at DSCI

The Data Security Council of India (DSCI), is an industry body set up by NASSCOM in 2008. With a specialised focus on data protection, we have established best practices, standards, and initiatives in cybersecurity and privacy to ensure a safe, secure, and trusted cyberspace.

Policy advocacy at DSCI consists of **live consultations** where we provide comments and input on draft laws, rules and policies relating to data protection, e-governance, emerging technology, and cybersecurity. In addition, we collaborate with leading organisations from the industry and academia to conduct **capacity-building** activities and strategic **policy projects** focused on the technology, healthcare and BFSI sectors. Interns working with us will have the opportunity to refine their research and writing skills while gaining valuable insights into technology law and policymaking.

Internship Program Details

April 1st to June 30th, 2024 (3 months): Interns are not expected to work on Saturdays and Sundays.

All internships come with a certificate and stipend.

Application Submission Deadline: 11:59 PM, March 17th, 2024.

Remote

Send your application in the manner specified on the next page to policy@dsci.in

Application Requirements

Applicant Background

- Law
- Technology
- Public Policy
- Other related fields

Required Documents

Applications without the following documents will be summarily rejected:

1. **Statement of Purpose (SOP):** In the body of the email, draft a 300-word SOP, detailing your interest in technology policy, your goals for the internship, and how your background makes you a perfect fit for this opportunity.
2. **Curriculum Vitae (CV):** Attach a CV of not more than two pages mentioning your academic background and co-curricular achievements. We recommend highlighting publications, projects and/or internships relevant to the program.
3. **Original Article:** Submit a 500-word article on a current issue in tech policy. This can be something you have published or written previously, or something entirely new. Do follow standard research-writing protocols. Use this to demonstrate your ability to engage with and succinctly express complex policy issues.

Make sure your application highlights your passion for technology policy and your professional goals. We look forward to receiving your application.
