OBJECTIVE OF EVENT

The conference aims to bring together **experts, professionals, researchers, students and enthusiasts** from diverse backgrounds to explore and discuss the latest advancements, challenges, and opportunities in the intersection of technology, innovation, and societal impact. With a focus on four key thematic areas – **Digital Innovation and Intellectual Property Rights (IPR), Climate Change and Green Technologies, Artificial Intelligence and Creativity, and Data Protection and Privacy** – the conference endeavours to foster interdisciplinary dialogue, facilitate knowledge exchange, and inspire collaborative efforts towards sustainable development and ethical use of technology.

Through keynote presentations, panel discussions, workshops, and networking sessions, the conference aims to provide a **platform for participants to exchange insights**, forge partnerships, and contribute to the advancement of technology in alignment with societal values and sustainable development goals.

The conference will delve deeper into various facets of Digital Innovation and IPR, Climate Change and Green Technologies, Artificial Intelligence and Creativity, and Data Protection and Privacy, offering a comprehensive exploration of these dynamic fields.

6	Paper presentation	20th and 21st April	

NOTE: Schedule for the Day 1 and Day 2 of the conference shall be communicated in an advance.

THEMES FOR PAPERS

THEME 1: DIGITAL INNOVATION AND IPR

With the rise of digital technologies such as artificial intelligence, blockchain, and the Internet of Things (IoT), there's a growing need to adapt IPR frameworks to protect digital innovations. Issues such as data ownership, algorithmic transparency, and digital content piracy present new challenges for intellectual property law.

THEME 2: CLIMATE CHANGE AND GREEN TECHNOLOGIES

As the world addresses climate change and transitions to a low-carbon economy, there's increased focus on promoting innovation in green technologies such as renewable energy, energy storage, and sustainable agriculture. Intellectual property frameworks play a crucial role in incentivizing research and development in these areas while balancing the need for technology diffusion and accessibility.

THEME 3: ARTIFICIAL INTELLIGENCE AND CREATIVITY

With the rise of AI-generated content, there are discussions about the attribution of authorship and copyright ownership in works produced by algorithms. Questions also arise regarding the liability for infringement and the ethical implications of AI in creative industries.

THEME 4: DATA PROTECTION AND PRIVACY

The collection, use, and sharing of personal data in the digital economy raise concerns about privacy, data security, and individual rights. Emerging themes include the intersection of intellectual property rights with data protection regulations, such as the General Data Protection Regulation (GDPR) in the European Union, and the development of privacy-preserving technologies.

ELIGIBILITY

Only the following are eligible to participate:

- Law students
- Professionals
- Academicians
- Research Scholars
- Teachers

CATEGORIES

1. Long Articles [Between 5000 and 8000 words]

Articles produced in this category are expected to strictly adhere to the theme. Fresh and novel ideas with a contemporary understanding of the topic are expected. For long articles, co-authors of up to two are permitted.

2. Essays [Between 3000 and 5000 words]

Essays submitted in this category are expected to be concise and clear, well within the ambit of the chosen theme. Balanced arguments under the issue are expected in the essays. They should be easily identifiable, engaging, and thought-provoking. For essays, co-authors of up to two are permitted.

FEE PAYMENT

Single author: 500/-

Author and co-author: 900/-

Author and 2 co-author: 1300/-
