Organizes

Five Day National Workshop

on

**‘Promoting Innovation and Creativity through
Intellectual Property Rights’**

INTELLECTUAL PROPERTY

29th April-3rd May, 2024

Mode: Hybrid

CENTRE OF EXCELLENCE FOR LAWS RELATING TO INTELLECTUAL PROPERTY RIGHT

The Centre of Excellence for Laws Relating to Intellectual Property Rights has been set up with the objective of promoting and conducting research in the field of Intellectual Property Rights. The Centre aims to provide training on IPR-related issues to government institutions, public/private sector corporations, NGOs, SHGs, etc., and to provide consultancy to vulnerable groups of society. The purpose is to disseminate knowledge by organizing lectures, and conferences on Intellectual Property Rights and publishing original and curated papers in an edited book with ISBN number.

ABOUT WORKSHOP

Intellectual Property Rights have emerged as fundamental tools for promoting innovation and creativity across various sectors, driving progress and competitiveness in the global marketplace. This theme explores the dynamic role of IPR in fostering an environment where new ideas and creative solutions are not only generated but also protected, encouraging continuous innovation and the development of new technologies. The National workshop will delve into how intellectual property can be effectively leveraged to stimulate creativity and innovation at all levels, from individual inventors and creative professionals to large corporations and academic institutions. Participants will gain insights into the various forms of intellectual property, including patents, copyrights, trademarks, and trade secrets, and how these tools can be used to safeguard and incentivize the creation and dissemination of innovative and creative outputs.

This Engaging workshop will cover the mechanisms of IPR that support the innovation ecosystem, addressing current challenges and opportunities within the framework of national and international intellectual property laws. Through expert-led sessions and interactive discussions, attendees will learn about strategic IP management, the economic impact of IP investments, and the balance between IP protection and the public domain. This workshop aims to equip participants with the knowledge and skills to navigate the complex landscape of intellectual property rights and use these tools to boost their own creative and innovative endeavors.

Intellectual Property Rights are intangible rights based on human intellect, including copyright, patent, trademark, etc. They encourage innovation but create monopolies. Some have time limits, others don't. With advancements like AI and IoT, new challenges arise regarding protection and ownership. This workshop aims to discuss these issues at national level to find solutions.

RESEARCH AND PUBLICATION CLUB

The Research and Publication Club has been established with the goal of fostering research skills and facilitating paper publications across a wide range of academic disciplines. The Club aims to enhance the research capabilities of its members and provide them with opportunities to achieve recognition through publications in respected journals like UGC-CARE and SCOPUS. Our mission includes organizing national conferences and guest lectures to disseminate knowledge and stimulate scholarly discussion among members.

The Club is dedicated to supporting its members in their efforts to contribute impactful research to their fields, offering guidance through the publication process and ensuring their work is showcased on prestigious academic platforms. Additionally, the Club seeks to broaden the scope of academic dialogue by hosting events that bring together diverse ideas and foster an environment of collaborative learning.
