"Sustainability in International Relations: Charting a Resilient Global Future"

The book will be published by Springer Nature, as part of the World Sustainability Series: <https://link.springer.com/series/13384>.

About the Book

As global interconnectedness deepens, the intertwined challenges of climate change, resource depletion, and environmental degradation threaten international stability and security. The planned book "Sustainability in International Relations: Charting a Resilient Global Future" aims to explore how sustainability principles are integrated into the domain of international relations, offering insights into diplomatic strategies, policy frameworks, and global governance mechanisms that promote sustainable development. Given the urgency of environmental crises and the need for multilateral cooperation, this book is important for understanding the evolving landscape where environmental considerations become central to international diplomacy and policy-making.

Submission Guidelines:

- Chapters must be original and unpublished, and not under review elsewhere.
- Prepare your chapter using the official Springer Book Chapter Template (MS Word format), adherence to Springer's formatting guidelines (margins, headings, references, figures, tables, etc.).
- The overall similarity score must be below 5%, and the AI-generated content (AI plagiarism) must be 0%.
- All submissions will undergo a double-blind peer review process.
- Abstract Submission Deadline: 10th December 2025 (No further extension). Full papers are due by 10th March 2026
- Abstracts of 200 words, including the title of the paper and the name(s) and contact detail(s) of the author(s) should be sent to: info@iccip.net

Abstract Submission Deadline: 10th December 2025.

Full Chapter Submission Deadline: 10th March 2026.

This book fills a gap by bridging the disciplines of environmental science and international relations, providing scholars, students, policymakers, and practitioners with a nuanced understanding of sustainability's role on the global stage. It highlights innovative approaches, assesses existing frameworks such as the Paris Agreement and SDGs, and proposes pathways for transforming international cooperation towards a more sustainable and resilient future. Its interdisciplinary focus enriches the literature by emphasizing the interconnectedness of ecological and geopolitical stability.

Other themes may also be considered. Please contact the Editorial Team with your suggestions
