**International Conference on Geographical Indications: Institutions, Technology,
Entrepreneurship and Social Impact**

Date: 10 - 11 April 2026, Friday-Saturday

Mode of Conference: Hybrid (Zoom Meeting & GD Goenka University, Gurugram, India)

Abstract/ Case Study Submission link: <https://forms.gle/Pb5iLPMhcTx8oPiw7>

1. ABOUT GD GOENKA UNIVERSITY, GURUGRAM, HARYANA

GD Goenka University is a private university located in Sohna, Gurugram, Haryana, India. It was established in 2013 by the GD Goenka Group through the Haryana Private Universities (Amendment) Act, 2013. The GD Goenka Group was founded by Shri A.K. Goenka. The University is approved by the University Grants Commission (UGC). GD Goenka University is an internationally acclaimed and premier institution of higher education in India. Quality education, aimed at directing students towards research, innovation, and extension, is the defining element of GD Goenka University. It is also recognized as a QS I-GUAGE "Diamond" rated University.

2. ABOUT THE CONFERENCE

Geographical Indications (GIs) occupy a critical intersection between intellectual property law, international trade, cultural heritage, development economics, and increasingly, technology-driven governance systems. Recognized under the TRIPS Agreement and embedded within national and regional legal frameworks, GI protection is widely promoted as a mechanism for safeguarding traditional knowledge, enhancing market differentiation, and supporting rural and artisanal livelihoods. Across jurisdictions—including the European Union, South Asia, and other emerging Global South economies—GI regimes have expanded rapidly, both in scope and regulatory sophistication.

Parallel to this legal expansion, technological interventions—such as digital traceability systems, blockchain-based provenance tools, e-commerce platforms, certification technologies, and data-driven supply chain management—are increasingly being proposed as solutions to long-standing challenges in GI governance, enforcement, and market access. Governments, international organizations, and private actors are investing in technological infrastructures to address issues of misappropriation, counterfeit goods, information asymmetry, and weak enforcement mechanisms.

Despite these developments, there remains limited empirical clarity on whether and how law, economics, and technology together translate into tangible economic gains and measurable social outcomes for primary producers. Existing scholarship has made important doctrinal, policy, and technical contributions; however, comparatively less attention has been paid to field-based evidence, distributional effects within GI value chains, the real-world adoption of technological tools, and their impact on producer agency and livelihoods. This has resulted in a persistent gap between legal intent, technological promise, and lived experience, particularly in contexts characterized by informal production systems, intermediary dominance, and asymmetric bargaining power. Against this backdrop, the proposed International Conference seeks to create a focused, high-level scholarly forum to critically examine the functioning of Geographical Indications in practice by integrating legal analysis, economic evaluation, and technological assessment, drawing on comparative perspectives and empirically grounded research to reassess prevailing assumptions about GI effectiveness.

3. ORGANIZER: SCHOOL OF LAW, GD GOENKA UNIVERSITY

The School of Law (SOL), GD Goenka University, Gurugram, is a research-oriented and professionally driven law school committed to excellence in legal education, interdisciplinary scholarship, and policy engagement. The School offers undergraduate, postgraduate, and doctoral programmes with a strong emphasis on intellectual property law, technology law, commercial law, international trade, and regulatory governance, alongside core public and private law disciplines. We actively integrate law with technology, economics, and social policy, encouraging empirical, comparative, and practice-oriented

research. Faculty members regularly engage with government bodies, international organizations, industry stakeholders, and civil society, contributing to policy consultations, academic publications, capacity-building programmes, and executive training. With a growing focus on internationalization, the School of Law seeks to foster global academic collaborations, joint research initiatives, and high-quality scholarly dialogue through conferences, workshops, and publications. The School is particularly committed to research and engagement that connects doctrinal legal analysis with real-world impact, especially in areas affecting development, innovation, and community livelihoods.
